# Concept map// You need to **write down** your first thoughts through keywords and **connect** them together.

**1.** Write down in **words** what you would like to explore in this project. Then, connect these words in categories and sub-categories to create a **concept map**. Start working alone and let your tutor guide you afterwards. Ask yourself the six **WH questions** to structure your thoughts.

**2.** Use the words written above to formulate **statements** and **research questions** to start your research.
